RELEASE Plan
GrepThink
Team GrepThink
Revision #1
January 22 - February 15

Team Members: Oscar Castro, Katerina Chinnappan, Eddy Chen, Henry Hargreaves

Top Level Goals: Add new capabilities to the GrepThink tool used to manage projects. GrepThink native Scrum Board and Assignment capability. Scrum Board Requirements: The ability to place and move a task to not assigned, in progress, and completed columns(Interactive, such as dragging, preferred) Ability to distinguish who is assigned to an in progress task Ability to create boards for separate sprints (BONUS) Be able to export a scrum board. Expand this system to allow the professor to choose the type and allow customization. Allow the professor to upload his own print out of the requirements for the assignment

Sprint 1
Goal: As a user, I want to fix the bugs in the current GrepThink version using Django

Point Breakdown:
2 Story Points - User Story 1: As a developer I want to learn Django
4 Story Points - User Story 2: As a developer I want to build a small basic app using Django
6 Story Points - User Story 3: As a developer I want to fix small bugs in GrepThink

Product Backlog:
